Experience

DIRECTOR OF MEDIA SERVICES, *KFP MEDIA*, CHELMSFORD, MA, 2010-Present

After partnering with a client for a few years a partnership was formed and *KFP MEDIA* was started. A small two person post house, my responsibilities were to help plan and pitch new media projects to clients and then implement them. Along with designing, I would manage and work directly with coders, other designers and of course clients to make sure the project, whether a video or a website, worked properly and was exactly what the client wanted.

- **Video:** shoot, edit, animate, graphics, publish to dvd & web
- **Web:** design, pitch, code, implement
- **Technical:** computer install, network support, consultant, setup for first timers

CONSULTANT, BRAD HILTON, 2007-Present

I have operated my own business for the last several years. I have developed an array of skills and clients which range from design (web, print, e-mail), video editing, server and it support. I frequently receive calls from clients needing something at the eleventh hour. Whether it's a presentation or last minute change—I pride myself in being able to deliver what they need accurately and efficiently.

- **Brochures:** design, collaborate, deliver
- **Email Marketing:** design, code, implement
- **A/V:** digital home theater, projector and surround sound setups
- **Photography:** portraits, events, id cards, slideshows

CREATIVE, *APPLE INC.*, BURLINGTON, MA 2005-2007

My goal was to establish myself as a “go-to-guy” for the store. Often called on to perform duties above and beyond my job description, I strove to be a valuable asset not only for the Creatives, but also for the Genius's and sales staff.

- **Technical:** imaged computers on the floor, maintained wireless network, implemented creative and genius servers
- **Customer Service:** computer repairs, lessons, genius bar appointments, repeat customers
- **A/V:** general merchandise, signage, new computers, new window displays

JUNIOR EDITOR, *AVID TECHNOLOGIES*, TEWSKBURY, MA 2005

I was hired at Avid following a semester long internship to perform a variety of video editing duties.

- **Web:** designed headers, online brochures
- **Video:** edited internal and external video pieces, delivered to internal website as well as ftp site
- **DVD:** authored and designed dvd menus

INTERN, *AVID TECHNOLOGIES*, TEWSKBURY, MA 2004-2005

Full time internship in which I helped with editing tasks as well as assisting on video shoots. I traveled around Massachusetts as well as New York to help setup lights, microphones and run a secondary camera.

- **Shooting:** gripped for shoots at NBC, lights, boom mic, monitored audio
- **Video:** logged, captured, edited, printed to tape, compressed to web and dvd

LAB SUPERVISOR, *ENDICOTT COLLEGE*, BEVERLY, MA 2003-2004

My responsibilities entailed locking down systems to limit student access, installing and updating software, and troubleshooting. I also trained and worked with faculty to implement remote desktop software and related protocols to enable the sharing of one computer screen's content to the twenty other computers. This brought a new level of interactivity and engagement to the classroom while changing how teachers planned lessons and taught technical material.

Education

Endicott College of Art, Beverly, Massachusetts, 2001-2005
